Why Feed Raw?

A raw diet maintains health in a way that medicine cannot touch. The simple addition of fresh raw meat keeps the PH, live enzymes and healthy bacteria your pup was born with naturally healthy. This helps maintain:

- white teeth
 - fresher breath
 - shinier coat
 - long term healthier digestion
- = long term healthier companion!**

Feeding 101

Feeding is as easy as it sounds, a Chunk A Day! Thaw a chunk (approx. ¼ lb) and feed to your pup daily in addition to their regular food. This chunk acts as a vitamin pack that replicates his current supplement at the kennel!

Ziggy is a Dominion's Creekside puppy that eats a 100% raw diet. He found his forever home with Ara Bush, owner, operator, founder of Raw Advantage Inc.
